Cincinnati Sub-Zero Partners with Testforce Canada to Distribute Environmental Testing Solutions for the Canadian Market

Cincinnati, OH, *July 17, 2023* - Cincinnati Sub-Zero (CSZ) Products, a leading brand of environmental test chambers, is excited to announce a strategic partnership with Testforce Canada, a renowned technical distributor of test and measurement solutions. This collaboration signifies an achievement for both entities as they join forces to deliver environmental test solutions across Canada.

As a highly trusted technical distributor in the test and measurement sector, Testforce offers reliable and personal technical guidance for customers searching for test solutions. Maintaining a portfolio of products from leading technology brands, Testforce provides solutions to customers working in communications, semiconductor, alternative energy, military/aerospace, education, power, automotive, and other technology sectors.

The partnership brings together two industry leaders known for their commitment to excellence, innovation, and customer satisfaction. Pairing Testforce's extensive distribution network and technical expertise with CSZ's industry-leading products will expand access to the latest environmental testing technology and customer guidance. From temperature and humidity to vibration and altitude testing, this partnership ensures customers receive a broader range of solutions to their unique testing requirements.

Through joint efforts, both companies aim to drive innovation and contribute to the success of customers in the varied and dynamic industries they serve.

About Cincinnati Sub-Zero Products

Cincinnati Sub-Zero is a leading brand of environmental test chambers with over 80 years of experience designing unique testing solutions. With a focus on innovation and customer satisfaction, CSZ products are tailored to meet customers testing needs and improve the safety and reliability of their products. Test chambers simulate virtually any environment including temperature, humidity, altitude, thermal shock and temperature/humidity/vibration, HALT/HASS chambers and industrial freezers.
